

X-ray Consent for Women

X-ray examination of the abdomen or pelvis expose the uterus to radiation. The 10 days following the onset of menstrual period are generally considered the safest for x-ray examination.

Onset of the last menstrual period: Date _____ Today's Date _____

I am pregnant: ☐ Yes ☐ No ☐ Don't Know

I have had a hysterectomy: ☐ Yes ☐ No ☐ Don't Know

I understand that if I am pregnant and have radiation to the abdomen, there is a slight possibility of injury to the fetus. Knowing this I consent to have x-rays performed during my examination.
